Presentación

Hispania Epigraphica inició su ya larga andadura en 1989 dirigida por el profesor Julio Mangas y publicada por el Ministerio de Cultura. Después de algunas interrupciones e incertidumbres sobre su continuidad, a partir de su número 5, ya en 1995, pasó a ser una publicación periódica de la Universidad Complutense, bajo la dirección de quien firma esta presentación. Desde entonces, con unos periodos más complicados que otros por razones muy diversas, hemos conseguido que los volúmenes hayan ido publicándose con una regularidad aceptable. No obstante, los actuales criterios editoriales de la Universidad han marcado un fin de ciclo e inicio de uno nuevo en la publicación. Los 20 primeros volúmenes se han publicado como revista, con ISSN (aunque también llevaban ISBN), a pesar de que *Hispania Epigraphica* no ha sido nunca una revista convencional, sino una publicación de actualización crítica bibliográfica sobre epigrafía de la Península Ibérica hasta época visigoda inclusive, como es bien conocido.

A partir del siguiente número, *Hispania Epigraphica* 2012, se publica como libro. En el momento de escribir estas líneas está en máquinas el volumen *Hispania Epigraphica* 2013, que, debido a una serie de cambios editoriales de la propia Universidad, se ha visto retrasado excepcionalmente, y está ultimándose para su entrega el siguiente volumen que será el correspondiente a 2014-2015.

Este cambio de ciclo, aunque no afecta al contenido ni apenas a su aspecto formal –pues solo modifica ligeramente la portada del volumen pero sigue manteniendo su característico color azul y su motivo fotográfico variable en cada volumen que tanto singulariza e identifica la publicación–, ha sido una buena oportunidad y una buena causa para atender una necesidad que se nos venía requiriendo desde hace tiempo por parte de muchos de nuestros lectores y usuarios y un *desideratum* propio que teníamos en el Archivo Epigráfico de Hispania: la necesidad de publicar los índices de, precisamente, esos 20 primeros volúmenes.

Ya publicamos hace tiempo, en CD, los 10 primeros volúmenes, en una tirada menor, utilitaria y recopilatoria, en el momento en que la Universidad Complutense comenzaba a poner en línea las revistas que

publicaba. Pero ahora se trataba de editar los índices de todos los volúmenes con una labor de revisión y de refacción de todos ellos aplicados de manera sistemática desde el volumen primero de *Hispania Epigraphica*. Como explican los autores del libro, los índices ya eran abundantes y variados desde ese primer número, pero poco a poco han ido ampliándose y ganando en complejidad, detalle, exhaustividad y, sobre todo, en útil información, muchas veces seleccionada a partir de las sugerencias realizadas por nuestros lectores y de las apreciaciones que nosotros mismos hemos ido sopesando en el transcurso de la elaboración de los diferentes números de la serie a fin de ofrecer a través de esos índices un compendio de datos e información que se revela muy provechosa no solo para la búsqueda interna dentro del propio volumen, sino para ofrecer elementos de estudio de muy distinto tipo que rebasan los límites de las entradas seleccionadas en cada número.

La ingente tarea de revisión de cada número, de aplicación sistemática de los índices actuales a todos y cada uno de los 20 volúmenes, lo cual supone, como puede comprenderse inmediatamente, la elaboración completa de algunos y la reelaboración de todos ellos, además de una labor sistemática de corrección de posibles errores que pudieran haberse deslizado en ellos, tiene dos nombres propios, José Luis y Charo. Permítaseme la mención coloquial. Son grandes profesionales. Han puesto todo su saber y todo su empeño en ello.

José Luis Gamallo es el principal responsable, de él partió la idea de rehacer los índices, de aplicar los “nuevos” a todos los volúmenes. Él comenzó a rehacerlos en solitario, con una paciencia casi bíblica, con la tenacidad que le caracteriza y sin perder la ilusión que, permítaseme también el coloquialismo, lo tiene encadenado al Archivo y a *Hispania Epigraphica* desde los lejanos tiempos de su inicio, lealmente y sin cejar en la tarea por encima de cualquier obstáculo.

Y la Profesora María del Rosario Hernando, que no le ha ido a la zaga en la tarea. Vinculada al Archivo casi desde hace tanto tiempo como él, ha sido su estrecha colaboradora; ha revisado, corregido, organizado, reelaborado –diría que hasta discutido y pactado– con José Luis para llevar a feliz término estos volúmenes.

Pero faltaría al sentido de la equidad y de la justicia si no reconociera que el mérito de este trabajo no es de ambos en exclusiva, aunque sean los principales protagonistas y sean los que, merecidamente, figuren como autores del libro. Si algo caracteriza al Archivo Epigráfico de Hispania es que se ha convertido en un centro de trabajo de ambiente inmejorable en el que a lo largo de estos años –ya más de 25– han trabajado y colaborado muchas personas. Algunos contratados con diferentes proyectos, becas, colaboraciones, prácticas de Grado o Máster, otros voluntariamente, todos con ilusión y afán.

Algunos han llegado con experiencia y competencia, otros las han adquirido en él aprendiendo de los demás. Solo de esta forma puede explicarse el inmenso patrimonio documental que poseemos con información de unas 28.000 inscripciones, que estamos actualmente digitalizando, la incipiente creación del Archivo medieval, la creación de bases de datos, la atención a investigadores y estudiantes y la publicación de *Hispania Epigraphica*.

Como cabe deducir de estas palabras, no son pocos los colaboradores que, de una u otra forma, han ayudado a José Luis y a Charo a recopilar datos, a revisar y corregir. No puedo mencionarlos sin temor a dejar a alguno sin citar. Como tampoco puedo enumerar, aunque estén citados en cada volumen, a los revisores científicos y a los miembros de nuestro Consejo Asesor, sin convertir esta breve presentación en una larga nómina de personas bien conocidas por todos. Todos ellos saben que cuentan con mi gratitud; sé que ninguno de ellos se va a molestar si no pongo sus nombres por escrito, son otros los lugares adecuados donde se ven reconocidos sus trabajos de modo individualizado —*cuique suum*—, y sé que todos entienden que este es el resultado de un trabajo en equipo, un gran equipo, un excepcional equipo que tengo la inmensa e impagable suerte de dirigir.

ISABEL VELÁZQUEZ

Prólogo

Por la innegable utilidad que podría comportar para cuantos estamos interesados en la epigrafía latina hispana, ya desde un punto de vista histórico, ya lingüístico, la idea de elaborar un volumen unificado de los índices de *Hispania Epigraphica* tomó cuerpo en una fecha temprana, cuando habían aparecido los cinco primeros números de la revista y se había acumulado una información más que relevante; de hecho, uno de nosotros realizó en su día una primera unificación de los índices de dichos volúmenes. No obstante, los avatares de la vida académica y personal, así como el propio carácter del trabajo a ejecutar, delicado y laborioso, han impedido la materialización definitiva del proyecto hasta la fecha.

No ha sido ajeno a esta demora el hecho de que, de manera casi continuada, los índices de nuestra revista se han ido enriqueciendo con nuevos registros: en ocasiones a instancias de nuestros colegas, que nos advertían de la utilidad que podía comportar la individualización de según qué campos (en cuyo diseño nos ayudaron amablemente), en otras, porque nuestra propia labor de vaciado así lo aconsejaba. A este respecto, el mayor salto cualitativo se produjo en el volumen correspondiente a *Hispania Epigraphica* 6, cuyos índices se vieron notablemente ampliados, bien con la subdivisión de algunos registros existentes (así, los apartados de Religión, Administración Local, Toponimia y Etnonimia, Cristianas y Cronología, todos ellos segmentados en registros más concretos), bien con la introducción de otros nuevos, algunos incluidos en el amplio apartado de Varia (Arquitectura, Delimitaciones sepulcrales, Espectáculos, Métricas, y un largo etc.) y otros, como los de Tipología e Inscripciones Inéditas y Comentadas, independientes. Tras *Hispania Epigraphica* 6, la ampliación de nuestro campo de trabajo (con la introducción de las inscripciones paleohispánicas) y de nuestras perspectivas de análisis, han comportado la paulatina revisión y mejora de los índices, de suerte que se han incluido registros novedosos, como el de Fuentes Literarias, o más detallados, como los correspondientes a Tribus o Munificencia, entre otros.

A sí pues, para su correcta adecuación al nuevo esquema resultante de las mejoras sucesivas, la elaboración de estos índices unificados ha exigido una completa revisión de todos los volúmenes (ya no cinco, sino veinte), de suerte que todos los datos contenidos en cada uno de ellos quedasen oportunamente anotados en sus campos correspondientes y, en consecuencia, se ofreciese una información completa. Dicho de otro modo: no presentamos el resultado de la simple fusión de los índices particulares de cada volumen, sino un índice integral, producto de una sistematización rigurosa y una cuidada labor de mejora que ha procurado subsanar cuantos errores (usuales –casi inevitables– en un trabajo de estas características) se habían deslizado en cada uno de los números de la revista. Creemos conveniente recordar, no obstante que, a efectos de inclusión de un determinado nombre o término en uno u otro índice, respetamos siempre las indicaciones de los autores cuyos trabajos vaciamos.

Los dos volúmenes que presentamos (uno para los números 1-10, otro para los números 11-20) corresponden, por tanto, al esquema más completo de nuestros índices:

I. *Nomina* y II. *Cognomina*. Como no podía ser de otra manera, los más extensos. Como única novedad con respecto a nuestros índices usuales, en las estructuras onomásticas registramos también, cuando procede, la indicación de la tribu.

III. Religión. Las divinidades se organizan en tres apartados: Grecorromanas, Orientales e Hispánicas; a ellos se unen diferentes índices para Seres mitológicos y legendarios, Sacerdocios y, finalmente, Varia, índice este último en el que se registran cuantos aspectos, términos y fórmulas son de interés para el ámbito religioso.

IV. Emperadores y monarcas. Recoge, por orden cronológico –señalando la datación de manera exacta o aproximada–, las menciones relativas a los emperadores y miembros de la familia imperial y a los monarcas, casi exclusivamente visigodos.

V. Cronología. Registra las menciones de los años consulares, de los reyes visigodos y de la era hispánica, así como otras referencias cronológicas menos usuales, como las indicaciones. Se completa con las indicaciones de calendas, nonas, idus y los nombres de los meses.

VI. Cargos e instituciones del imperio. Contiene las referencias a los diferentes cargos de la administración imperial: los del orden senatorial, los del orden

ecuestre y los *apparitores* y las funciones subalternas. Se completa con un apartado para el erario, el censo y los tributos.

VII. Ejército. Organizado en apartados específicos para sus diferentes cuerpos (cohortes pretorianas, legiones, alas, cohortes auxiliares y de vigiles, *classis*), unidades tácticas (centurias, decurias, turmas), mandos militares (senatoriales y ecuestres) y grados inferiores.

VIII. *Populus romanus*. Tribus. Por un lado contempla las referencias a la estructura del *populus*, como *civis*, *plebs*, etc, y por otro, las tribus. Estas últimas aparecen recogidas de dos maneras: primero, las menciones de las tribus y los municipios y colonias donde aparecen y, después, los municipios y colonias con las tribus que se documentan en cada uno de ellos; en cada testimonio se señala el estatus jurídico y la procedencia de cada individuo.

IX. Geografía. En este índice, siempre extenso, se registran primero las entidades de mayor envergadura (provincias, regiones, *concordia* y *conventus*), después Roma —de forma individualizada— y las entidades menores (*civitates*, *pagi* y *vici*) y, finalmente, las menciones de los diferentes accidentes geográficos (montes, ríos, etc.) y las vías.

X. Administración local. Recoge los diversos aspectos de la estructura municipal —tales como las referencias a *civis*, *civitas*, *colonia*, *res publica*, *municipium*, *ordo*, *decuriones* y las diferentes magistraturas— pero también contempla otros menos usuales en los índices epigráficos, como la munificencia y los homenajes municipales. Por último, se consignan las diferentes estructuras indígenas: *castella* y *castellani*, *cognationes*, *gentilitates*, etc.

XI. Colegios y asociaciones y XII. Oficios y profesiones. Sin duda, los índices menos nutridos de cuantos conforman el catálogo.

XIII. Inscripciones cristianas y judías. Constituye en sí mismo un índice completo de todos los datos de interés registrados en estos epígrafes: onomástica, nombres sagrados, dignidades, monumentos sagrados, *carmina* y un nutrido apartado de varia.

XIV. *Notabilia*. Recoge las menciones a diversos ámbitos temáticos, de indudable importancia, que no tienen cabida en los índices previos: arquitectura e ingeniería, delimitaciones sepulcrales, espectáculos, *figlinae/officinae*, expresiones de elogio y pésame, fórmulas de salutación y de temática sepulcral, metrología, relaciones familiares y sociales y un apartado de *notabilia*.

XV. Tipología. Organiza las inscripciones según criterios diversos: contenido (jurídicas), lengua y escritura (paleohispánicas, griegas, bilingües), soporte

(mosaicos, pizarras, zoomorfos), tipología (grafitos, miliarios), época (visigodas), etc.

XVI. *Carmina*. Registra las inscripciones métricas, individualizadas por sus *initia*.

XVII-XXI. Se trata de índices instrumentales dedicados, respectivamente, al registro de las inscripciones inéditas y comentadas, las tablas de correspondencia, los lugares de procedencia, las fuentes literarias y las abreviaturas de provincias y distritos.

Esperamos que estos volúmenes, concebidos como una herramienta de consulta, cumplan con su objetivo: proporcionar a cuantos investigadores están interesados en la antigüedad hispana, en general, y en su epigrafía, en particular, una información completa y organizada.

Hispania Epigraphica es una serie periódica de actualización bibliográfica y de reseña crítico-científica de las publicaciones novedosas sobre epigrafía latina, griega y en lenguas paleohispánicas de la Península Ibérica hasta época visigoda incluida. Se elabora en el Archivo Epigráfico de Hispania por un nutrido equipo de investigadores, técnicos y colaboradores, asesorados por un comité científico internacional.

Isabel Velázquez es catedrática de Filología Latina de la Universidad Complutense de Madrid y directora del Archivo Epigráfico de Hispania y de la serie Hispania Epigraphica. Es especialista en epigrafía y textos latinos de época tardoantigua y medieval, autora y editora de más de una veintena de libros y de más de cien artículos y capítulos de libros.
